Back To School: Fairy Tales Do Come True With Lice Prevention

We received this product for review purposes. As always all opinions are honest and solely mine.

Lice is not nice! I mean, at least that is what I have heard and hope to never have to experience. Thanks to Fairy Tales Lice Prevention products we are not taking any chances with JustaBXgirl's beautiful long tresses (or mine). One of the things I heard a lot from other moms when researching this whole littles go to school thing is that almost every school deals with the creepy little critters at some point.

I'm hoping we will be long gone from JustaBXgirl's school when they deal with the infestation but again, this mama refuses to take any chances so we will be using prevention products for Fairy Tales hair care line. As you know I don't like putting just anything on JustaBXgirl's hair and skin so I'm always on the lookout for natural based products. Fairy Tales Rosemary Repel Lice Prevention line helps prevent lice using natural plant extracts and organic herbs.

You might think to prepare for something that might not even happen is a waste of time and worry but let us think about this clearly. I'm betting if you're anything like me you pay for insurance on your phone. Now, I don't plan to drop my phone but I pay for it just in case. I love JustaBXgirl's hair. Every single strand on her head is important to me. If she told me tomorrow she wanted to cut it off I would tell her okay and then go cry in the shower. I want to protect her hair.

If I didn't take the precaution and she came home from school with lice I would be devastated. I feel like we would never get rid of the pests. She has long hair. I have long hair. Her female cousins have long hair. We are all proud members of #teamlonghairdontcare and none of us want that to change.

NYC public schools have a no lice policy but according to some mom groups I'm in it only helps so much.

To be safe we are using these three Fairy Tale products all of which are:

- Proprietary blend of organic Rosemary, Citronella, Tea Tree and Geranium oils clinically proven effective to help prevent lice
- Jojoba and Chamomile hydrate, moisturize and soothe the scalp
- Gentle, safe and effective for daily use for the entire family
- Free of sulfates, harsh chemicals and toxins
- Gluten, soy, dairy and nut free

We also have the Lice Goodbye Mousse just to be on the safe side. I know, I'm a mess. These are the moments that you can tell that I'm a first-time mom because I worry about things that haven't occurred yet. Still, I would rather be safe than sorry. And if you want to be safe too then enter the contest below to win your own Fairy Tales package!!!
