Natural & Effective way to keep Bugs away at Summer Camp with @fairytalesinc

Summer and summer camps will be here before we know it! Crazy to think when we just had snow last week! - oh I love living in Buffalo ;) It's important to start thinking about that packing list. Most overnight summer camps provide the basics for your child, but many don't prepare for the creepy critters that tend to spread between little wilderness warriors. That's right – pesky problems such as bed bugs, mosquito and lice are full-time attendees at most summer camps, so it's important to pack safe and effective essentials to keep bad bugs at bay! Dealing with them the week after camp is no picnic!

One brand I've relied on is Fairy Tales, here are a few of the products I include while packing for my kids Camping Trips. Plus, they are free of harsh chemicals, pesticides, parabens, sulfates, and toxins.

Lice-Repellant Shampoo

There is nothing worse than bringing home extra campers from summer camp! Close proximity in camp cabins and sharing caps and clothing create the perfect storm for a lice outbreak. To protect your child, simply pack a shampoo that will naturally repel lice. **Fairy Tales Rosemary Repel Daily Shampoo (\$12.95)** gently cleanses the scalp while a proprietary blend of organic Rosemary, Citronella, Tea Tree and Geranium oils help prevent lice. They also carry a conditioner and conditioning Spray. My daughter is a fan of using the spray even when she's not camping because she loves the scent of it.

Bug Spray

Even if your child loves creepy, crawly things, mosquito bites and bee stings can make summer camp unpleasant. So don't forget the bug spray — just be sure to use one made for kids. **Fairy Tales Bug Bandit (\$15) DEET-free formula (\$13.95)** promises to repel fleas, mosquitoes, ticks, and biting flies all with a mere spritz.

Bed Bug Protectant

Camp cabins are a breeding ground for bed bugs. Not only will they leave your child with itchy bites, but they'll also be coming home with them in their suitcase (yikes). Bed bug sprays are often harsh and unsafe, so be sure to read the ingredients before packing one. **Fairy Tales Sleep Tite Bed Bug Spray (\$5.95)** is an EPF exempt formula that is classified as minimal risk and uses natural ingredients that have been shown to help kill bed bugs and their eggs.

Fairy Tales complete line is available at Ulta, Bed, Bath & Beyond, select salons, pharmacies and retail stores, as well as online at www.fairytaleshaicare.com. #1 recommended by pediatricians, school nurses and moms since 1999!
