

Tamar Alexia Fleishman's Marco Polo style discoveries

If you've been living life right this summer, you've had a lot of fun! You've seen the sun, the eclipse of the sun, the pool, the beach, the wind whipping about you on great road trips. Did you bring home cool souvenirs? Sweet memories? Good for you. But you probably also acquired dry, dull, frizzy, broken and faded hair. Here are a couple of new, interesting products that will fit your end of vacay budget. I was happy to be hosted to experience them!

During your travels — even if it's to the community pool — do you need some help after a hard day at play? **Fairy Tales Hair Care** has been creating natural products “for families” since 1999. Now, *don't freak out*, but their focus is on head lice. But they have other products, too! I'm all for secret fabulous beauty products, wherever I may find them . . . aren't you? **Coco Cabana After-Sun Spray** is easy to use as a detangler and extra form of conditioning. It has all kinds of interesting, replenishing ingredients like amaranth protein, sage extract, oak bark and coconut oil. It's not greasy, though! It's light and fluid, but effective. The product has a natural coconut fragrance.
